Performance Overview

DYNO Dyno Nobel James Fazzino
Managing Director
& CEO

Safety performance

	2012	2011
Fatalities	0	0
TRIFR (1)	1.45	1.24
Recordable cases	106	93
Moranbah LTIs (2)	0	0

⁽¹⁾ Total Recordable Injury Frequency Rate – rolling twelve months

⁽²⁾ Lost time injuries during the construction and commissioning period. Over 4 million hours worked.

Group performance

NPAT⁽¹⁾ -24% to \$404.7m

Explosives EBIT⁽²⁾ +8% to \$399.9m

Fertilisers EBIT⁽²⁾ -40% to \$270.9m

Dividend +8% to 12.4cps (final dividend 75% franked)

Debt Headroom \$1.1b

Moranbah AN Plant Production commenced

- (1) Net Profit after Tax attributable to shareholders, excluding Individually Material Items
- (2) Earnings before Interest and Tax excluding Individually Material Items

Explosives performance

Explosives EBIT up 8% to \$399.9m

DNAP EBIT up \$16m (+8%) to \$211.3m

- Underlying EBIT¹ up \$19m (+17%) to \$130.2m
- Significant contribution from supply of Initiating Systems ("IS") and Services to Moranbah foundation customers
- Volume growth in base business slowed in second half

DNA EBIT up \$16m (+9%) to US\$195.7m

- Agriculture & Industrials business benefitted from higher prices
- Restructured Canadian business delivered higher EBIT
- Impact of lower Coal volumes negatively impacted the result
 - (1) EBIT ex Moranbah Unfavourable Contract Liability release

Business delivers to strategy

Fertilisers performance

- Fertiliser EBIT down \$178m (-40%) to \$270.9m
- Impact of Commodity prices (-\$41m) and higher AUD:USD rate (-\$40m)
- Mt Isa outage costs (-\$22m) and lower volumes (-\$22m)
 - Record Ammonium Phosphate production in the second half of 2012
- Lower margins from distribution businesses (-\$59m), significantly impacted by fluctuating global prices
- Strong execution in second half (production and distribution) sets up 2013

Consolidated business better positioned to manage price risk

Strategy

Demand drivers:

China's urban population is expected to increase by 300-400 million people over the next 15 years¹

By 2031, over 90% of revenue growth in Australian mining will be driven by **volume not price**²

World **coal-fired power generation** is expected to grow 67% over the next thirty years³

The **global population** is expected to swell from 6.5 billion today to 9 billion by 2050 – ie. over 60 million new mouths to feed every year for the next forty years¹

80% of growth in grain by 2050 is expected to be from emerging economies **shifting their food consumption patterns** as per capita wealth increases⁴

Due to the decline of **arable land**, higher yields and more intensive use of land is expected to contribute more than 90% of growth in global crop production⁴

Explosives

- Leveraged to hard commodities (volume not price)
- Growth platform of IPL
 - Offers a number of attractive growth opportunities

Fertilisers

- Leveraged to soft commodities (volume and price)
- Strong cash generating business
- Capital invested to drive efficiency

Sources:

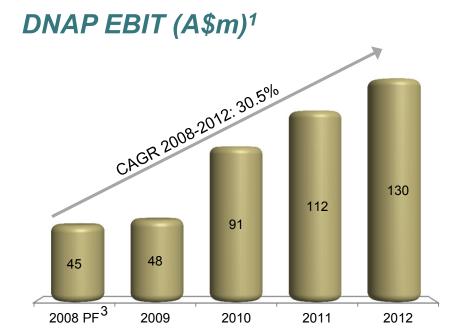

- 1) UN Population Information Network
- 2) Port Jackson Partners
- 3) U.S. Energy Information Administration
- 4) Food and Agriculture Organisation of the UN

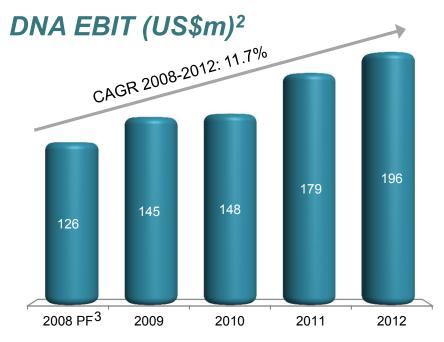

Soft commodities

commodities

Hard

Explosives now 60% of Group EBIT

- Strong growth through a difficult trading period
 - Dyno Nobel total EBIT CAGR 2008-2012: 17.2%⁴
- Positive outlook for both geographic markets with a range of growth opportunities available
 - 1) Dyno Nobel Asia Pacific excluding the impact of the Moranbah unfavourable contract liability release
 - 2) Dyno Nobel Americas reported EBIT
 - 2008 result is pro-forma to assume that the acquisition of Dyno Nobel occurred as at 1 October 2007. Source: IPL 2008 Financial Statements (Note 28) excluding \$9.0m of the Moranbah unfavourable customer contract liability release.
 - Calculated on a constant currency basis (2008 average rate of AUD:USD: 0.90787)

Driving shareholder returns

GROWTH OPTIONS US Ammonia Moranbah AN plant de-**DELIVER ON OUR** bottleneck **PROMISES** Newcastle AN plant (deferred by at least two years) Moranbah AN plant Capital light expansions Third Filter Train at in Canada, Latin America **FOCUS ON CASH** Phosphate Hill and Indonesia **GENERATION** Pilbara Emulsion plant New Markets BEx Other? Fertiliser business consolidation US business reorganisation Capital efficiency

Re-investment competes with return of cash to shareholders

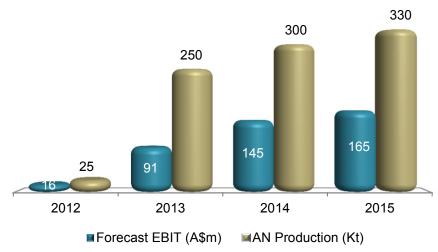

Continued focus on

cash conversion

Moranbah - Update

- 4 million hours lost time injury free
- Project 100% complete
 - Front-end plants commenced production in July 2012
 - Ammonia plant commenced production in September 2012
- Cash construction cost \$986m (5% above sanctioned spend)
 - Minor cost-over run due to rain and lower labour productivity
- Operations team on site and involved in commissioning process
- 25kt production in final quarter of 2012
- On track to produce 250kt of AN (76% of capacity) in the 2013

Moranbah - Forecast Contribution

Slide 12

Pilbara emulsion and Third filter

Pilbara Emulsion Plant, Western Australia

- Construction completed
- Plant currently being commissioned
- Underpins Pilbara business

Phosphate Hill Third Filter Train, Queensland

- Construction completed
- Plant currently being commissioned
- Investment will:
 - increase reliability of the phosphoric acid plant
 - allow the processing of a wider range of phosphate rock

BEX

- Long transformation of the way we do business
- Roll out on track
 - Manufacturing in 2012
 - Value Chain in 2013
- Early value creation however this is an investment for the long term
- Creating and retaining value will include higher and more reliable plant production, lower conversion costs, move to world class supply chain management

FY13 costs of \$25m will be matched by EBIT generated of \$25m

\$5 million savings

per annum

Case Study: Phosphate Hill

2012 Year End Financial Results

 By mining the gypsum dams, the Phosphoric Acid plant will be able to recycle phosphoric acid in the AP production process from 2013

BEx Cultural Foundations BEx Manufacturing Module

Leading and Managing Change Human Capital Teamwork Set-up Time Reduction Visual Management Focused Improvement Environmental Sustainability Health & Safety Autonomous Maintenance Asset Care Set-up Time Reduction

Achieved Benefits

- Increased production tonnes
- ✓ Reduced input costs
- Reduced fixed costs
- Reduced production spares costs
- ✓ Reduced maintenance costs
- Greater efficiency in sustenance capital spend
- ✓ Improved plant reliability
- ✓ Improved quality
- ✓ Lower waste
- ✓ Improved production accuracy
- Improved capacity planning

Continuous improvement in our business operations

Slide 15

And this is just the beginning...

US Ammonia feasibility study update

Construction Cost

- Project is being developed through a rigorous Front End Loading process
- Working with the best EPC companies in the world
- Brownfield site should offer a significant discount to a greenfield project site

Financial Return

- Driven by differential between US and Eastern Europe gas prices
- Potential first mover advantage
- Strategic value of the project is integrating the entire AN production of the US Explosives business back to US gas economics

Final Investment Decision

Q2 of 2013 calendar year

Investment hurdles will not be compromised

Financial Performance

Frank Micallef
Chief Financial Officer

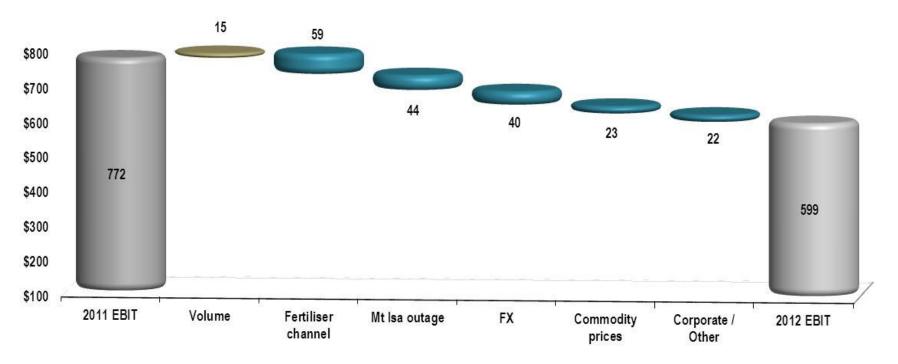

IPL Group financial performance

Year Ended 30 September (A\$m)	2012	2011	Change %
Revenue	3,500.9	3,545.3	(1%)
EBIT ⁽¹⁾	599.1	772.1	(22%)
NPAT ⁽¹⁾	404.7	530.1	(24%)
Reported NPAT ⁽²⁾	510.7	463.2	10%
EPS (cents) ⁽¹⁾	24.8	32.5	(24%)
Dividend per share (cents)	12.4	11.5	8%
Operating cash flow	620.8	719.1	(14%)
Operating cash flow / EBITDA (%)	82.2%	78.1%	, 0
Net debt	(1,286.9)	(1,188.8)	(8%)

⁽¹⁾ Excluding individually material items

⁽²⁾ Net Profit after Tax attributable to shareholders

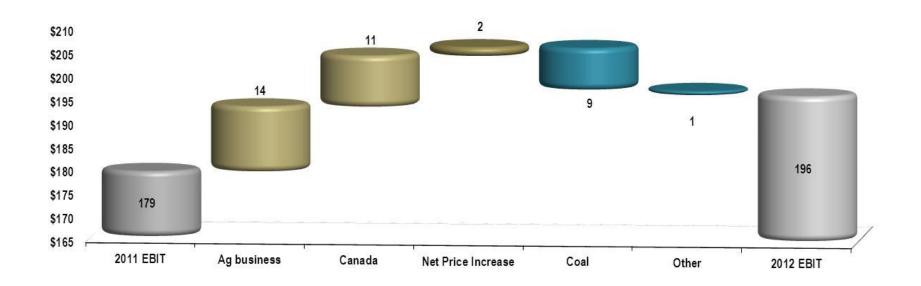

GROUP – EBIT waterfall

- ✓ Explosives Key drivers include net increase in volumes, Velocity and commodity prices the key drivers
- Fertilisers Commodity price (-\$41m), FX (-\$40m), Mt Isa outage (-\$44m), Lower margins from distribution businesses (-\$59m)

DNA (USD) – EBIT waterfall

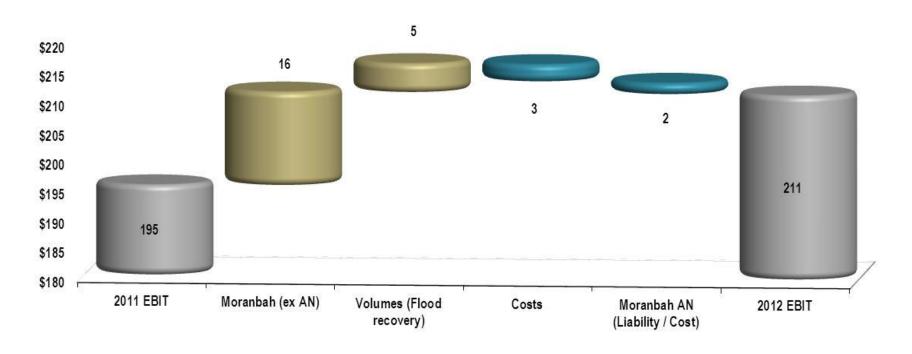

- ✓ Increased contribution from Agricultural & Industrials business (St Helens plant)
- ✓ Benefits from the restructured Canadian business
- Negative impact of US Coal volumes

DNAP – EBIT waterfall

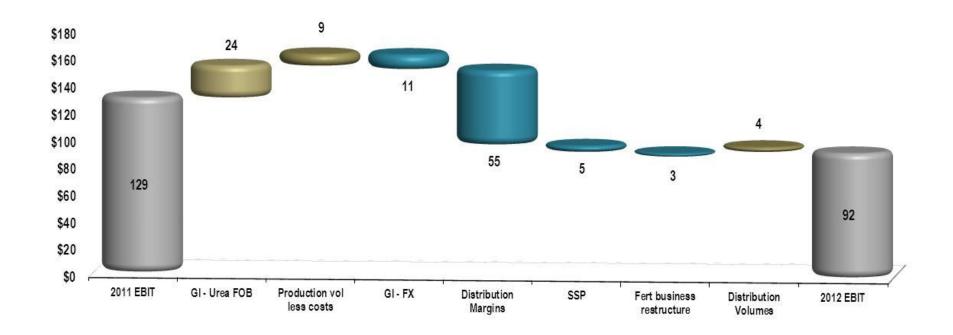

- ✓ Higher earnings from IS & Services to Moranbah foundation customers
- √7% underlying AN Volume growth
- Moranbah unfavourable customer contract liability released in full

IPF - EBIT waterfall

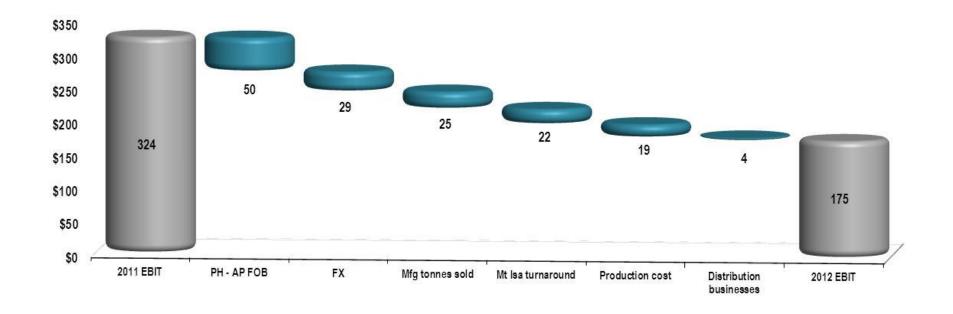

- Lower distribution margins, significantly impacted by fluctuating global prices
- ✓ GI profit contribution up \$22m (higher Urea and production offset by FX impact)
- ✓ Fertiliser volumes up 6%, driven by pasture market recovery

SCI – EBIT waterfall

- Negative impact of lower DAP prices and higher AUD:USD rate (-\$79m)
- Mt Isa Final Absorption Tower repair: \$22m of costs and \$22m volume impact (-\$44m)
- Higher production costs higher Sulphuric Acid input costs & inflationary pressures
- Net decrease in Distribution businesses Quantum (-\$25m), Industrials (+13m), SCI (+\$8m). Quantum business returned to profit in the second half

Balance Sheet & Treasury

Frank Micallef
Chief Financial Officer

Strong investment grade capital structure

	Sept. 2012	Sept. 2011	Target range
Net debt / EBITDA ⁽¹⁾	1.7x	1.3x	< 2.5x
Interest cover ⁽²⁾	7.9x	10.8x	> 6.0x
Gearing Ratio ⁽³⁾	24%	24%	

Headroom (including cash) \$1.1b

Average tenor of drawn funds 4.9 years

- (1) Net debt / 12 months historical EBITDA, at point in time
- (2) Interest cover = EBITDA / interest expense excluding discount unwind
- (3) Net Debt / (Net Debt + Equity)

3 investment grade credit ratings

Capital management outcomes - Net debt

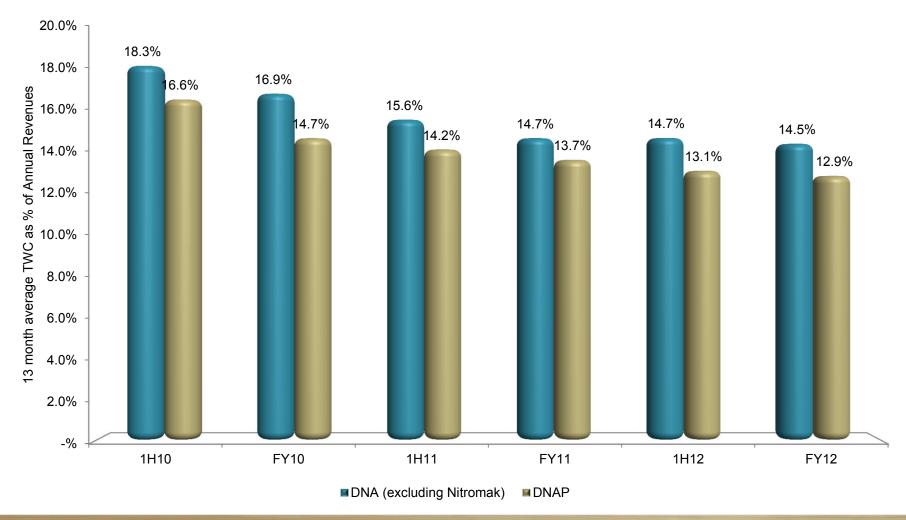

Net debt increased by \$98m since September 2011 to A\$1,287m

- Operating cash flow decreased by \$98m to an inflow of \$621m
 - EBITDA¹ decreased \$165m (-18%) and tax payments increased \$82m, offset by strong Trade Working Capital performance
- Dividend payment \$187m (+24%)
- Moranbah spend \$238m (excluding capitalised interest)
- Sustenance spend down by \$50m to \$155m
- Effective interest rate 5.8% (inclusive of upfront costs and commitment fees)
 - (1) EBITDA excluding IMIs

Credit metrics strong at peak funding levels

Improving trade working capital position

Explosives Business – 13 month rolling average Trade Working Capital as % of Annual Net Revenue

Value-adding risk management – FX exposures

2012: FX hedging strategy delivered \$51m in incremental earnings.

 All-up hedged AUD:USD rate of \$0.96 vs average market rate of \$1.03

2013: USD Transactional exposure – Australian manufactured fertilisers.

 90% covered at no worse than AUD/USD \$1.05 (inclusive of premium costs), full participation

Risk management approach to FX

OUTLOOK

James Fazzino
Managing Director
& CEO

Outlook – 2013 Explosives

- DNAP Moranbah AN plant is on track to produce 250kt of AN in FY13, generating an incremental \$75m of EBIT
- DNAP Base business flat
- DNA Explosives business expected to generate modest earnings growth
- No scheduled turnaround at the St Helens plant

Outlook - 2013 Fertilisers

- Distribution margins in the IPF business expected to recover to normal levels, supported by improved execution and risk management
- No scheduled turnaround at the Gibson Island plant. Phosphate Hill production 900kt of AP's.
- Quantum expected to return to profit
- AUD:USD rate headwind

Appendices

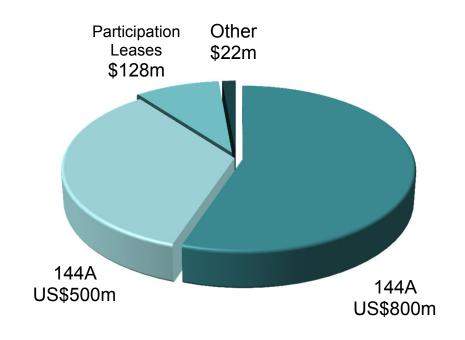

Debt structure delivers value

✓ No refinancing risk until April 2014

US Debt Strategy

- Maintains debt/EBITDA as USD depreciates
- Partially hedges USD earnings translation exposure
- Allows participation in low interest rates (approx. 40% hedged)

Drawn Funds at 30 September 2012

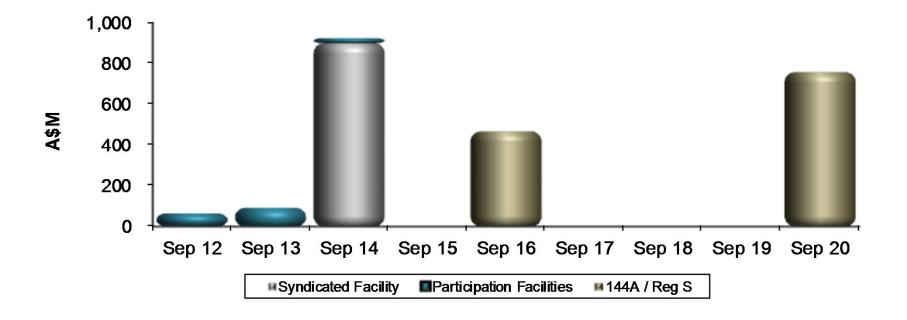

Strong capital structure

Capital management - Interest cost

Year Ended 30 September (\$m)	2012	2011	Change
Total borrowing costs	121.1	110.3	(10%)
Less unwinding of discount on provisions	25.3	25.2	
	05.0	05.4	(400()
Underlying interest cost	95.8	85.1	(13%)
